

Wondering where we get the equipment?

- ✓ TE rents equipment to its customers. At the end of the committed rental period, customers may return the equipment. We then inspect all the incoming machines and select only those that are able to be reconditioned. Others are recycled for parts or used for training purposes.

Pricing / Savings

- ✓ Purchasing a reconditioned machine typically saves the buyer 30-50% off normal/new machines prices!
- ✓ Reconditioned inventory is always changing, so if you notice a machine or equipment you're interested in, place your order quickly!
- ✓ Need a piece of equipment not on the available list? Call TE at **717-810-2763** and be put on a call list.

Quotes / Ordering

- ✓ Call **717-810-2763** to have your questions answered, get a quote or place an order.
- ✓ Special options, requirements, and configurations will be discussed at that time.
- ✓ When it comes to lead makers, we can add any accessory or option that addresses your exact configurations and standards.

The most recent list of reconditioned equipment is available on-line at tooling.te.com/recond equip.asp
